9. Reality check: your papers should look like these.

10. Long squiggly line. Draw a long squiggly line at the bottom of the rectangle on page "A".

11. Trace the long squiggly line 3 times. Trace the long line onto page "B", at the top and bottom of that rectangle. Then put page "A" on top and trace the line onto the top of that rectangle.

13. Choose a shape. Maybe it looks like a cat? Okay! Cat, pig, rhino... anything is ok.

14. Tweak the shape. Use pages "A" and "B" to make small changes. Can you make the shape look more like a cat? Remember, any line you change, you must change on both sides and both pages!

15. Copy the shape to page "C". Fill all the rectangles with your shape.
